## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5-7, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Okada et al. 5,182,349 or Mitsubishi Petrochemical Co. EP 0 468 418.
3. Okada et al. disclose applicants' copolymer in the Abstract, photostabilizing agents (UV absorbers) in column 10, line 36 and incorporation into other polymers in the paragraph overlapping columns 9 and 10 and column 13, lines 15-26. The contents of Mitsubishi are the same. Applicants' claims are not novel.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 1714

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 2 and 4-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al. 5,182,349 or Mitsubishi Petrochemical Co. EP 0 468 418, in view of Sudo et al. 5,262,233, further in view of Galbo et al. 5,844,026 or Bonora 5,948,836.

7. The primary references have been discussed already. Sudo et al. teach an agricultural film made from applicants' polymer in columns 5 and 6. Bonora, in claims 11-15, and Galbo et al., in claims 28 and 29, show that agricultural films have been routinely exposed to pesticides. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to use the copolymer of Okada et al. or Mitsubishi with a photostabilizer, to make the film of Sudo et al., in order to take advantage of its excellent weather resistance and to contact it with the pesticide of Bonora or Galbo et al., since agricultural films are routinely exposed to pesticides. The amount of UV stabilizer is conventional. See claim 5 of Bonora or claim 8 of Galbo et al.

***Allowable Subject Matter***

8. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
